Fall 2009
FROM: R.W. Nelsen, Professor
Department of Sociology
SUBJECT: SOCIOLOGY 2111 FA

Description

This year's edition of the course will focus on the interconnections between individual character and social structure as developed in work done in the 1950s and 1960s at the University of Chicago and Columbia University. The biographies and intellectual work of two individuals, Reuel Denney and C. Wright Mills, will be given special and detailed attention in connection with the sociology done at these two schools during these two decades. There also will be some material presented regarding the sociological traffic between Chicago and New York, as well as discussion of the influence of sociologists from previous generations (dating back to before 1900) on the development of the Chicago and Columbia "schools" of sociology. My hope is that attention to this material will help you (students) and myself develop our sociological imaginations, as together we think about various social issues and problems.
