This brief guide is primarily for students doing assignments at Curtin University, not for those publishing using the APA 6th style. If you are publishing in the APA 6th style, please consult the APA publication manual:

American Psychological Association. (2009). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

It is important that you check the assignment guide of your department or school as some details, such as punctuation, may vary from guidelines provided in this guide. You may be penalised for not conforming to your School's requirements. All referencing queries should be addressed to the appropriate lecturer or supervisor

A reference or citation consists of components that allow the reader to trace the original book, article or website you have consulted and cited.

### Book:

### Journal article from a database:

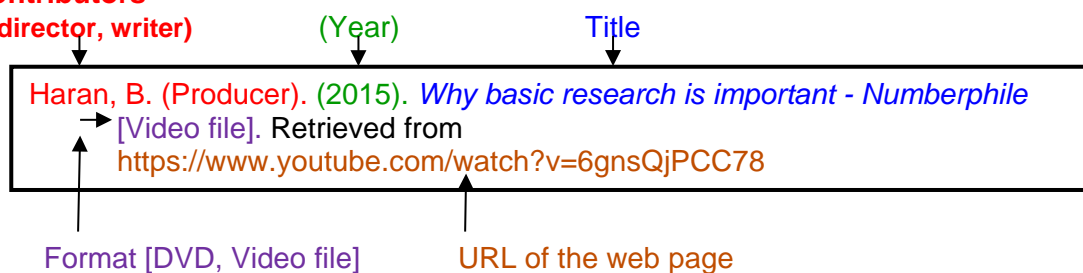

### Web Page:

### Online Multimedia:

#### Primary contributors (Producer, director, writer)

NB. APA uses **sentence style capitalisation**, so only the first word in the title, subtitle or proper nouns should be capitalised (as shown in the examples above).

# APA Referencing Rules

## 1. Collecting Bibliographic Information

Note down the full bibliographic details of the source from which the information is taken, including the relevant page number(s). This information is the basis of a **citation or reference**.

In the case of a **book**, 'bibliographical details' refers to: author/editor, year of publication, title, edition, volume number, place of publication and publisher as found on the front and back of the title page. (Not all of these details will necessarily be applicable).

In the case of a **journal article** the details required include: author of the article, year of publication, title of the article, title of the journal, volume and issue number of the journal, and page numbers.

For all **electronic information**, in addition to the above you should note the DOI (Digital Object Identifier) if one exists, and if one does not exist, use the web address (URL).

### **Correct:**

doi:10.1037/rmh0000008

<https://doi.org/10.1037/rmh0000008>

### **Incorrect:**

<http://doi:10.1037/rmh0000008>

doi:<http://dx.doi.org/10.1037/rmh0000008>

Retrieved from <http://dx.doi.org/10.1037/rmh0000008>

For more details see *What is a DOI?* on page 9.

## 2. In-Text Citations

A citation inserted at the appropriate place within the text of the document is called an **in-text citation**. This usually takes the form of the name of the author, followed by the year of publication.

Two acceptable forms of in-text citations are:

Miller and Collins (2009) - use **and** when family names are outside parentheses

(Miller & Collins, 2009) - use **&** when family names are inside parentheses

If two or more *authors* are cited at the same point in the text then they are included in the same in-text citation, in alphabetical order separated by a semicolon, e.g., (Brown, 2016; Smith, 2015).

### **When to Include the Year in Citations Appearing More than Once in a Paragraph**

- all parenthetical citations (i.e., citations in which both the author name and publication date are enclosed within parentheses e.g. (Morin, 1988)) **should include the year**, regardless of how often they appear in a paragraph.
- when the name of the author is part of the narrative and appears outside of parentheses, after the first citation in each paragraph you need **not** include the year in subsequent non parenthetical citations as long as the study cannot be confused with other studies in the article (see p. 174 in the sixth edition of the Publication Manual).

### 3. Page Numbers & Quoting

When **directly quoting**, quotation marks must be placed around the quote and the relevant page number must be given, e.g. (Fleer, 2015, p. 5). Use p. for a single page and pp. for double pages.

When **paraphrasing** the APA 6th manual (p. 171) encourages you to provide page or paragraph numbers to help the reader locate the information. Use paragraph number for .html documents (e.g. Engineers Australia 2009, para. 4)

**NOTE:** Some Schools require that you supply a page number when paraphrasing, so check with your lecturers for their expectations.

#### Examples of Direct Quotes

For fewer than 40 words, incorporate the quote into the text and use double quotation marks. See examples below.

According to Palladino and Wade (2010), “a flexible mind is a healthy mind” (p. 147).

In 2010, Palladino and Wade noted that “a flexible mind is a healthy mind” (p. 147).

In fact, “a flexible mind is a healthy mind” (Palladino & Wade, 2010, p. 147).

“A flexible mind is a healthy mind,” according to Palladino and Wade’s (2010, p. 147) longitudinal study.

Palladino and Wade’s (2010) results indicate that “a flexible mind is a healthy mind” (p. 147).

#### Long Quotes

If the quotation is 40 or more words use a freestanding block of text

- start on a new line
- indent the block about half an inch from the left
- use double spacing
- omit quotations marks
- at the end of a block quotation, cite the quoted source and the page or paragraph number in parenthesis after the final punctuation mark

<http://blog.apastyle.org/files/block-quotations.pdf>

#### How to Cite Material without Page Numbers

If the cited material does not have page numbers (such as may occur with some e-books) and you need them for an in-text citation, use any of the following location information instead:

- a paragraph number, if provided; alternatively, you can count paragraphs down from the beginning of the document;
- an overarching heading plus a paragraph number within that section; or
- an abbreviated heading (or the first few words of the heading) in quotation marks, in cases in which the heading is too unwieldy to cite in full, plus a paragraph number within that section.

## 4. Reference List

A reference list includes books, journal articles etc. that you have cited in the text of your essay whereas a bibliography is a list of sources consulted as well as cited.

- references should appear at the end of your work on a separate page
- word references should appear centred at the top of your reference list
- the reference list is arranged alphabetically by author
- where an item has no author it is cited and listed by its title
- all titles should appear in sentence-style capitalisation
- the second and subsequent lines of each reference need a hanging indent
- all reference entries are double spaced (see page 180 & 37 of the APA Style Guide)
- see the Sample Reference list tab in this Referencing Guide

### Reproducing Tables and Figures

Tables are numerical values or text displayed in rows and columns.

Figures are any type of illustrations (charts, graphs, photographs, drawings, maps ...) other than a table.

If you are reproducing a table or figure you can either copy or adapt it.

### Tables

Above the **Table:**

Place a table number at the top of the table. Number tables sequentially i.e. if you have more than one table in your writing e.g. Table 1, Table 2 etc.

Each table must be referred to in the text, using a capital T, for example: ...as shown in Table 1

The title is placed directly below the table number. It should be in italics and with major words capitalized with no full stop.

Below the **Table:**

*Note.* Adapted/Retrieved/Reprinted from "Title of Article," by A. A. Author, B. B. Author, and C. C. Author, year, *Title of journal, volume(issue)*, p. X Copyright year by publisher.

**In-text citation**

As shown in Table 1, the responses were provided .... OR Maslach and Leiter (2008, Table 1, row 3)

Do not write “the table above” (or below) or “the table on page 32,”

**Reference list**

The reference list entry follows the format of the reference type from where you found your table (journal, book, website etc.). **Note:** The table above was sourced from a journal article, therefore we would follow the format for a journal article reference.

**Figures**

**Figures reproduced in your text**

When you use a figure that has been adapted or copied directly from another source, you need to reference that original source.

The figure no. is your own and the title in the caption is from the source. Number all figures with Arabic numerals (1, 2, 3 etc.) in the order in which they are first mentioned in the text. Do not use suffix letters like A, B or C.

**Caption below figure**

Figure Y. Title of the figure in the source. Reprinted [or adapted] from “Title of Article,” by Author First *Initial*. Second Initial. Surname, Year, *Journal Title*, Volume(issue), p. X. Copyright Year by the Name of Copyright Holder.

## Abbreviations used in referencing

<b>ed.</b>	Book edition e.g. 4 <sup>th</sup> ed. – place after the title, not necessary for a first edition
<b>Ed. or Eds.</b>	Editor(s) use when a book has an editor(s) – Kasdorf, W.E. (Ed.).
<b>et al.</b>	'and others' (from <i>Latin</i> ) (Gradel et al., 2007)
<b>n.d.</b>	No date - when a resource does not have a date of publication, use (n.d.) after the name of the author.
<b>p. or pp.</b>	Page(s) - if one page number is being used, use the abbreviation p. but for multiple pages use pp. as shown here. According to Haran (2012, pp. 23-30) (Roitman, 2014, p. 12)
<b>para.</b>	Paragraph - for electronic sources without page numbers, use the paragraph number instead - e.g. (Clarke, 2013, para. 2)
<b>Vol. or Vols.</b>	Volume(s) - include in reference list if books have volume information (Vol. 19, pp. 699-740)
<b>Rev. ed.</b>	Revised edition
<b>No.</b>	Number
<b>Suppl.</b>	Supplement

## Publication details

**No date of publication** - Use 'n.d.' for the year in the citation and reference list.

**Example:** Author. (n.d.). For same author with multiple citations use e.g.

Smith, J. (n.d.-a)

Smith, J. (n.d.-b)

**Approximate date** - Precede the year with ca for circa

**Example:** (ca. year)

**Author the same as the publisher** - Replace the name of the publisher with the word author

**Example:** Author name. (year). Title. Place of publication: Author

**Place of publication** - For places in Australia or the United States: Follow the place of publication by the postal abbreviation for the state. For other places: Use the name (or abbreviation) of the country.

**Examples:** Melbourne, VIC: Berlin, Germany: Los Angeles, CA:

**No place of publication** - Only required for printed materials that are not journals. If a book does not have a place of publication, use 'n.p.' to indicate no place.

**Example:** Author. (year). *Title*. n.p.: Publisher.

## What is a DOI?

The **Digital Object Identifier (DOI®)** System is used to uniquely identify objects in the digital environment, for example a journal article, ebook, or data set.

The online environment is inherently unstable, and information about a digital object, including its location, may change over time. The DOI name will not change, thus **the DOI provides a persistent link to the object.**

This DOI pinpoints a specific article among all those published electronically, by all publishers. You can type the DOI directly into a catalogue, database, or search engine.

An example of a DOI is: **10.1016/j.enpol.2009.06.014.**

You can also turn the DOI into a link you can look up on the internet by adding the prefix <https://doi.org/> to the DOI number. This is called a resolved DOI. An example is **<https://doi.org/10.1016/j.enpol.2009.06.014>**

The DOI can be expressed as either doi:10.1037/rmh0000008 or <https://doi.org/10.1037/rmh0000008> however, you must be consistent and retain the same format throughout your reference list.

### Underlined hyperlink in URL

This can be removed if required. APA has no rule regarding the inclusion of a hyperlink and they provide no guidance. This is at the discretion of the respective lecturers. For more information see the [APA Style Blog](#)

### In-text citation

The first in-text citations to each of these articles would be as follows:

(Marewski, Gaissmaier, & Gigerenzer, 2010)

(Marewski, Gaissmaier, Schooler, Goldstein, & Gigerenzer, 2010)

For subsequent in-text citations we would abbreviate works with three or more authors to the first author name plus *et al.* However, doing so here would produce two Marewski et al. (2010) citations. Spell out as many names as necessary in the subsequent citations to tell the two apart:

(Marewski, Gaissmaier, & Gigerenzer, 2010)

(Marewski, Gaissmaier, Schooler, et al., 2010)

Notice that for the first reference, this means that all citations to this source will include all three names. For the second reference, the two remaining names can be abbreviated to *et al.* (Note, however, that if only one name remains to distinguish the references, that name must be spelled out with all the rest because *et al.* is plural—it cannot stand for only one name.

## Different authors same surname
