

Co-operative Education

Why should I consider enrolling in a Co-op program?

- Co-op placements are a great opportunity to gain valuable, relevant work experience in your field while earning money to finance your education.
- You will connect with future employers, get job search assistance, and receive personalized support throughout the co-op process.
- This alternate mode of learning involves at least 16 months of paid work experience.
- Co-op provides you with invaluable career experience and helps you gain an advantage in a competitive job market.
- For many students, Co-op has led to full time employment upon graduation.

During my Co-op terms I have had the opportunity to work in diverse sectors, gain a wide variety of experience, both public and private, travel across Canada, and network with various companies. The Co-op program has been an enjoyable and rewarding experience and I would recommend it to anyone who is interested.

- Daniel Willman, HBComm Accounting
