President's Report to Board of Governors

Lakehead
UNIVERSITY

Office of the President

A million reasons to smile

Lakehead University's new Centre for Advanced Studies in Engineering and Sciences (CASES) received a welcome boost from the City of Thunder Bay during City Council's July 23, 2018 meeting.

City Council unanimously approved a \$1 million commitment to CASES, a building renovation and expansion project that will help position Lakehead University and Northwestern Ontario as a key Canadian research and innovation hub by improving the scale and quality of leading research, training, and entrepreneurship.

2018-2023 Strategic Plan

Following Senate's endorsement, Lakehead University's Board of Governors approved our 2018-2023 Strategic Plan.

The overarching goal of this Strategic Plan is to strengthen Lakehead University's vision of providing a transformative university experience grounded in exceptional scholarship and student potential.

Lakehead University's 2018-2023 Strategic Plan is built around five interrelated and interconnected strategic themes:

- **Academic Excellence,**
- **Social Responsibility,**
- **Local and Global Partnerships**
- **Entrepreneurship and Innovation**
- **Capacity Development.**

Lakehead University student's art featured on new coin

A fourth-year visual arts student at Lakehead University says it feels incredible to have designed one side of a new coin for the Royal Canadian Mint.

The Royal Canadian Mint asked **Mary McPherson** to participate in the design process for the new coin.

She was thrilled when the Mint chose her image of Tecumseh, a legendary Shawnee war leader who allied himself with the British and heroically led hundreds of First Nations warriors into battle at such places as Fort Meigs and most famously, Detroit.

Released on Tuesday, Sept. 4, the new coin recognizes the 250th anniversary of Tecumseh's birth.

Assembly of First Nations supports Indigenous Certificate in Geological Studies

In late July, a collaborative effort between a number of First Nations and Métis community groups and education authorities and our departments of Chemistry, English, Geology, Mathematics, and Physics was rewarded when the Assembly of First Nations voted at its annual meeting in British Columbia to support the development of an Indigenous Certificate in Geological Studies at Lakehead University.

The goal is to develop a science-based university program that will support Indigenous Peoples as they engage in sustainable economic development, set program goals, and discuss co-regulation with provincial and territorial governments on lands and resources. Best of all, the certificate will be delivered in First Nations and Métis communities.

Lakehead University welcomes record number of international students

Lakehead University welcomed 700 new international students, this year — a new record. More than 600 of them from approximately 65 countries participated in our International Orientation held at the Hangar on Wednesday, Aug. 29.

[*Click here to view media release...*](#)

Students from approximately 65 countries learned about services offered at Lakehead University and in the community at our International Orientation.

Academic Excellence

Rennie receives grant to restore Great Lakes' ecology

Earlier this year, Lakehead University's **Dr. Michael Rennie** received an Early Researcher Award of \$100,000 through the Ontario Ministry of Research, Innovation, and Science.

With an additional \$50,000 from Lakehead University, the five-year grant supports Dr. Rennie's research to restore the ecology of lakes negatively impacted by industry.

Researchers shed new insight into fate of Franklin Expedition

A team of academic researchers from MacEwan University, **Lakehead University (Anthropology's Dr. Tamara Varney)**, Western University, Trent University, University of Waterloo, and Canadian Light Source at the University of Saskatchewan, have shed new light on a historic mystery. Did the crew die because lead poisoning played a pivotal role in the loss of the Franklin Expedition? The research report published in *PLOS ONE*, the world's first multidisciplinary Open Access journal, suggests otherwise.

Dr. Tamara Varney

The Franklin Expedition began in the summer of 1845 under the command of Sir John Franklin when 128 officers and crew aboard the ships *HMS Erebus* and *HMS Terror* entered the waters of Arctic North America with the goal of completing the discovery of the Northwest Passage. The following year, the ships became stranded in ice off King William Island where they remained until April 1848. By this time the crew, now reduced to 105 men, made a desperate attempt to reach the mainland. Sadly, not one individual survived.

Research could help reduce risk for experiencing postpartum depression

Lakehead PhD candidate **Carley Pope** aims to one day help women reduce the risk for postpartum depression. She discussed her research on maternal mental health at a media event in the Agora at Lakehead University on July 31.

Pope has been doing a studentship for Mental Health Research Canada since 2016 that ends in March 2019. Her research explores the benefits of mindfulness on pregnant women and in combatting postpartum depressive symptoms.

How has climate change affected the boreal forest?

Thanks to a \$440,000 Strategic Partnership Grant from the Natural Sciences and Engineering Research Council of Canada, **Dr. Han Chen**, a professor in Natural Resources Management, will spend three years working with a team of researchers from Lakehead University, the University of Alberta and the University of Winnipeg to examine how climate change has affected western-central boreal forests in Canada over the last 60 years. The team will train a number of PhD students who will help explore strategies to mitigate climate change stresses and assess the consequences of climate change on future wood supply.

Professor studied 1.4 billion-year-old rocks to determine abundance of life on Earth

Lakehead University Geology's **Dr. Phil Fralick** is part of a team of researchers who collaborated on an article exploring oxygen and life that was featured on *Nature.com*, this past summer. The article describes how the researchers used gypsum from east of Thunder Bay to determine if there was as much life on Earth approximately one billion, four hundred million years ago as there is now.

Lakehead researcher exploring new ways to discover mines

A Lakehead University researcher is playing a key role in an international project to improve the way companies discover new mines.

Dr. Peter Hollings is collaborating with researchers at the Centre for Ore Deposit and Earth Sciences (CODES) at the University of Tasmania. This \$2.36 million (CAD) project is funded by 11 mining companies and is part of AMIRA International's *Far field and near mine footprints – Finding and defining the next generation of Tier 1 ore deposits* project.

Dr. Hollings will spend the next three years developing tools that will help mining companies discover new ore deposits by investigating changes in the chemistry of minerals around the mineralized areas.

Local and Global Partnerships

Canada's brightest youth at SHAD for intense enrichment and entrepreneurship

Starting in 1980, SHAD immerses students from grades 10-12 in a one-month enrichment program focused on STEAM: science, technology, engineering, arts and math. In July 2018, Lakehead's Coordinated by Lakehead's **Dr. Sultan Siddiqui**, students came to Lakehead to interact with renowned university faculty and visionary corporate leaders. In one exercise, students were challenged to derive an original solution to a societal problem. SHAD teaches participants about entrepreneurship and innovation and leaves the students seeing how they can make an immediate impact.

2018 Bill Keeler Memorial Golf Classic

Dr. Michel Beaulieu, President of the Alumni Association of Lakehead University, as well as several Lakehead University students, were at Whitewater Golf Club on August 14 to greet participants of the Bill Keeler Memorial Golf Classic. Gillian Hansen, who plays on Lakehead's varsity women's volleyball team, thanked the 148 participants of the annual Golf Classic, which raised \$55,302.01 for student financial aid and student athletes. RBC was once again the title sponsor of the annual golf classic.

Lakehead's Fall Orientation helps students transition to university

The Student Success Centre, Residence & Conference Services, and the Lakehead University Student Union organized this year's *Thunderwolves How!!* Orientation from August 29 - September 1. Events and activities catered to students entering from high school, college/university transfers (including our new Lakehead-Georgian Partnership students), as well as international, Aboriginal and mature students well attended.

Proyecta 10,000 scholarship students' visit

On Thursday, July 19, Lakehead University International hosted a welcome reception for Héctor Javier Rayón Martínez, Deputy Director of Technological Universities for the Government of the State of Mexico. Attending the event were 153 Mexican students who studied in our 4-week Academic English Program, this summer.

The students were participants in the *Proyecta 10,000* scholarship, which aims to support 10,000 Mexican students, teachers and researchers to study in Canada by 2018. Through this scholarship, Lakehead University had the opportunity to welcome a total of 400 Mexican students during the summer of 2018.

Indigenous people from different countries gathering for unique tourism discussion

Earlier this year, faculty, staff and students from Lakehead University, York University and partner university Escuela Superior Politécnica de Chimborazo (ESPOCH) visited Indigenous leaders from Ecuador and Ontario in traditional territory belonging to Comuna Kichwa Verde Sumaco and Lac Seul First Nation. The goal of this pilot project, funded by SSHRC Connections, is to seek solidarity in overcoming challenges and describing opportunities in nature- and culture-based tourism.

Science Week Introduces Indigenous Youth to Careers in Natural Resources

Forty-five Indigenous youth from 25 communities were in Thunder Bay during the first week of August learning about geocaching, cartography, sustainable energy, entrepreneurship and more as part of Science Week for the First Nation Natural Resource Youth Employment Program (FNNRYEP) and the Outland Youth Employment Program (OYEP). The youth and their counsellors are part of sister programs at Sandbar and Mink Lake summer camps, a collaborative project between industry, the province, and Confederation College and Lakehead University.

Since 2000, Outland Camps has partnered with Confederation College and Lakehead University to offer land-based education training and employment programs for Indigenous youth in Ontario. To date, the partnership has resulted in over 430 participants from 55 communities completing the programs.

Social Responsibility

Lakehead University joins Thunder Bay Anti-Racism & Inclusion Coalition

On June 19, Lakehead University was among eleven major Thunder Bay organizations that signed an Anti-Racism & Inclusion Accord at City Hall. This coalition announced that it would commit to establishing goals and report on successes by working together to address racism and discrimination in the community.

The Accord and Calls to Action set the stage for each member organization to commit to:

1. Addressing racism against Indigenous and racialized persons by setting short- and long-term goals to meet the calls to action or recommendations.
2. Supporting an ongoing process of truth & reconciliation throughout their organization and in our community by developing and maintaining respectful relations with Indigenous governments, organizations and individuals,
3. Reporting on goals, annually, beginning in June 2019.

The following CEOs/CAOs were in attendance to sign the Accord:

- Norm Gale, City of Thunder Bay (Coalition Co-Chair)
- Ken Ogima, Fort William First Nation (Coalition Co-Chair)
- Moira McPherson, Lakehead University
- Sylvie Hauth, Thunder Bay Police Services
- John Pateman, Thunder Bay Public Library
- David Paul Achneepineskum, Matawa First Nations Management
- Ken Adams, Confederation College
- Ian MacRae, Lakehead Public School Board
- Pino Tassone, Thunder Bay Catholic District School Board
- Jean Bartkowiak, Thunder Bay Regional Health Sciences Centre
- Lisa Beckwick, St. Joseph's Care Group
