| Rationale for this proposal: | | 1. First YearThe change to Geography 1140 reflects our decision to support the course change being proposed by Geography.2. Third Year HBScF - "Specialization in Wood Science" StreamName Change to more accurately reflect the content and goals of the HBScF program stream in question. It is important to portray to potential and existing students the breadth of subject matter and career options available through this stream.3. Third Year HBScF - "Specialization in Forest Products and Marketing (should the request be approved)This change provides more flexibility to students in the Forest Products and Marketing stream with respect to their electives. We found that the requirement for a first year Engineering course was not feasible operationally and we understand anecdotally from students that the lack of flexibility was deterring them from choosing this stream. |
