Degree Details | **Requirements** | **Supporting Documents**

Justification: The essence of this Calendar change proposal is to formalize this pilot project by calendaring a new course that includes a lab component for a. our Geography majors, including those in Geography and Environmental Studies programs and b. students in other Faculties/Departments (e.g., Faculty of Natural Resources Management) that wish to take advantage of the additional teaching and learning opportunities provided by a lab. The change has five parts (1. The existing course without a lab, GEOG 1120; 2. A new course, GEOG 1140, with a lab; and 3 to 5. outlining how the changes to GEOG 1120 affect Geography programs including Concurrent Education programs). Other units (e.g., NRM) will be required to make their own adjustments to their programs.

-----------------------	---------------------	-----------------------------

Justification: The essence of this Calendar change proposal is to formalize this pilot project by calendaring a new course that includes a lab component for a. our Geography majors, including those in Geography and Environmental Studies programs and b. students in other Faculties/Departments (e.g., Faculty of Natural Resources Management) that wish to take advantage of the additional teaching and learning opportunities provided by a lab. The change has five parts (1. The existing course without a lab, GEOG 1120; 2. A new course, GEOG 1140, with a lab; and 3 to 5. outlining how the changes to GEOG 1120 affect Geography programs including Concurrent Education programs). Other units (e.g., NRM) will be required to make their own adjustments to their programs.
