Justification: The current fourth year long capstone course ENST 4800 is being removed. This half year course will contain portions of the material that was previously covered in ENST 4800. The course will expose students in the HBESc and HBES programs to practicing professionals in the environmental field. One objective will be to provide students with the knowledge necessary for them to assist their future employers in achieving their environmental goals, such as reducing their negative ecological footprint. The learner outcomes of this course align with the program standards of ECO (Environmental Careers Organization) Canada. ECO Canada is the accrediting body of both degrees. Students will have an additional field school option available at year 3.
