| Course Description: | Provides a broad introduction to the many elements that comprise an information system and briefly explores the underlying information technologies and their impact on business organizations. Emphasis is placed on managers' information needs, the various kinds of support necessary for decision-making, and the functional and strategic implications of information systems for organizations. Through the use of cases, course participants will be expected to demonstrate an awareness of current developments and the ability to identify dominant issues and possible solutions arising from the adoption of new technologies. | ~~Provides~~ The course provides a broad introduction to the many elements that comprise an information system and briefly explores the underlying information technologies and their impact on business organizations. Emphasis is placed on managers' information needs, the various kinds of support necessary for decision-making, and the functional and strategic implications of information systems for organizations. ~~Through~~ During the ~~use of cases~~course, ~~course~~ participants will be expected to demonstrate an awareness of current developments and the ability to identify dominant issues and possible solutions arising from the adoption of new technologies. |
| Rationale for this proposal: |  | The purpose of this proposed calendar change is to align the course description with revised course content. The current course description suggests that case method is the principal pedagogy of the course. In this course case students are utilized to provide illustrations of how organizations use IT in managing their businesses. Case studies for the purpose of describing the applications of IT concepts and principles are only one of several techniques used in this course. |
