Title:	Environmental Issues: A Geographical Approach	Environmental Issues: A Geographical Approach
AcademicLevel:	Undergraduate	Undergraduate
CreditWeight:	1.0	1.0

Zone 2: Required Information – Detailed

	Current Version	Proposed Version
Course Description:	An introduction to current environmental issues using an approach which stresses the interrelationships between environments and societies. The major environmental and societal components of the earth/atmosphere system will be examined to provide a base for the consideration of the nature and development of modern environmental problems. Potential solutions to the problems will be evaluated through consideration of such elements as technology, politics, economics and planning.	An introduction to current environmental issues using an approach which stresses the interrelationships between environments and societies. The major environmental and societal components of the earth/atmosphere system will be examined to provide a base for the consideration of the nature and development of modern environmental problems. Potential solutions to the problems will be evaluated through consideration of such elements as technology, politics, economics and planning.
Rationale for this proposal:		The restrictive note refers to the course Environmental Assessment (EA 1110): Introduction to Environmental Studies. At the suggestion of the Calendar Officer, the Department proposes to remove this note as the course (EA 1110) has been inactive since November 2001 and it is unlikely a student would attempt to use both courses to earn credit towards a degree.
Required or Elective:		[?]
Cross List:	Environmental Studies 1120	Environmental Studies 1120
Offering:	3-0; 3-0	3-0; 3-0 [?]

Zone 3: Additional Information
