KINE 5730 – Issues in Gerontological Research

The purpose of this graduate course is to give the student an understanding of aging as it is related to motor development, health and physical activity. Specific areas of study include exercise adherence and physical activity patterns, social-psychological theories and their applicability to aging populations, falls, gait adaptations and the effects of grieving and widowhood on physiological status and performance, and physiological expectations and ranges in an aging population.

Minor changes to description to make it more concise and accurate.
