CIHR is on track to resume the normal Fall schedule for the Fall 2021 Project Grant competition

What's New for the Spring 2021 Competition

Following recommendations from the community, the following changes will be implemented:

- Summary of progress
- Applicant Profile CV
- Removal of weighted scores in the evaluation criteria
- Sex and Gender Based Analysis

Entry of Foundation Grant Holders

Foundation Grant holders may apply within 18 months of their grant expiry

PJT Spring 2021 is the first competition where non-ECR Foundation Grant holders will be eligible to apply to the Project Grant Program.

130 Foundation Grant holders from the 2014 cohort are eligible to apply to the Spring 2021 Project Grant competition.

CIHR has been modelling potential impacts on panels (and will continue to monitor closely).

We are taking steps to minimize impacts on the funding system as a whole, including presenting transition options to Foundation grantees:

- Grant deferrals
- Budget reductions when multiple grants are held

Competition Budget

The budget for the Spring 2021 Project Grant competition is \$325M.

- This represents an increase of \$50M from the Fall 2020 competition.

Within the investment allocated to each Project Grant competition, there will be a funding envelope for:

- Large grants. Large are defined as those within the top 2% largest total grant amount requested by all applicants within the competition and varies with each competition.
- Indigenous Health Research. 4.6% of the total competition budget is dedicated to supporting applications with an Indigenous health research focus.
- Equalization. A portion of the competition budget is reserved to ensure the proportion of grants funded is at least equal to the proportion of applications received from ECRs, females and applications submitted in French. Any unused funding is re-invested in the competition to fund additional Project Grants.

Decision Making Process for Project Grant Competition

Using the principles of:

- Funding research excellence
- Ensuring equity, diversity, and inclusion
 - A separate funding envelope (4.6% of competition budget) to Indigenous health research
 - Ensure that the proportion of grants funded is at least equal to the proportion of applications submitted by the following groups:
 - Early Career Researchers (as usual)
 - Female Nominated Principal Investigators
 - French applications
- Fairness and transparency of process

Additional decision process points:

- Intervention, if required, will be imposed at the competition, not panel, level
- Large grant funding envelope will remain in effect

Upcoming Equity, Diversity and Inclusion (EDI) Online Discussion

- **Date:** February 4, 2021 – April 9, 2021
- **Purpose:** To identify specific measures that CIHR can implement to address barriers faced by racialized and Indigenous communities.
- **We specifically invite** the engagement of racialized and Indigenous communities with lived experience of systemic racism in the health research sector although the online discussion will be open to all.
- **Spring / Summer 2021:** CIHR will hold virtual small group listening sessions with racialized communities on systemic racism in the health research funding system
- We will also hold **dedicated engagement activities** with Indigenous communities to discuss how CIHR can supplement our [action plan](#) to build a healthier future for First Nations, Inuit, and Métis Peoples in a way that further recognizes and addresses systemic racism.
