

Part 1: Course Information

Instructor Information

Dr. Gabriel D. Dakubo
Contract Lecturer
Department of Biology
Lakehead University
Contact e-mail: gdakubo@lakeheadu.ca;

Course Description

This is an introductory microbiology course for the health sciences. Thus, the focus will be on basic microbiological issues involving human health and wellbeing. We will deal with aspects of microbial cell biology of importance to our understanding of microbial functions in health and disease, and then we will take a look at some aspects of public health and medical microbiology.

Course Duration

May 1st 2014 – June 13th 2014 (6 weeks)

Prerequisite

Nursing students

Textbook and Course Materials

Microbiology: An Introduction. 11th Edition by Tortora, Funke and Case (required text).

Course Requirements

Internet connection
Access to *Desire 2 Learn (D2L)*

Course Structure

This course will be delivered entirely online through the course management system *Desire 2 Learn* delivery platform. You will need your user name and password information to login to the course from the *D2L home page*.

In *Desire2Learn*, you will access online lessons, course materials, and additional resources.

Technical Assistance

If you need technical assistance at any time during the course or to report a problem you can contact: mycourselink@lakeheadu.ca or CEDL office: cedl@lakeheadu.ca or Phone: (807) 346-7730.

Part 2: Course Objectives

This course is designed for you as a nursing student to understand the important roles microorganisms play in human health and well-being. Although well engrained in the minds of everybody, including health care professionals that microbes are harmful, they are more beneficial than detrimental to us.

To really appreciate how microbes affect our health, you need to understand the basic biology of microorganisms, including microbial anatomy, physiology, growth, genetics, and metabolism. This core knowledge is what will lead you to recognize microbes as etiologic agents of disease, their mechanisms of pathogenicity, modes of spread, sensitivity to chemotherapy and resistance to some antimicrobial agents.

You will meet these course objectives by thoroughly studying the various modules (spending at least 3 hours per week on each module), preparing for each exam/quiz, and contributing to discussions as necessary.

Use the study objectives and questions in the power point presentations, as well as questions at the end of each chapter as a guide to test your comprehension of the contents in the chapter. Additional resources are also provided in each module. Please enjoy microbiology by challenging yourself!!!

COURSE SYLLABUS**

Part 3: Course Outline

Important Note: Refer to the course calendar for specific information. Activities and assignments will be explained in detail within each week's corresponding learning module as required. Pay attention to important dates and times. If you have any questions, please contact me.

Module	Topic	Readings Chapters	Exam Date
1	The microbial world and you	1	
2	Functional anatomy of prokaryotic and eukaryotic cells	4	
3	Microbial metabolism	5	
	Midterm Exam 1 – Modules 1, 2 & 3		May 16th
4	Microbial growth and control	6 & 7	
5	Microbial genetics	8	
6	Biotechnology and DNA technology	9	
	Midterm Exam 2 - Modules 4, 5 & 6		May 30th
7	Principles of disease and epidemiology	14	
8	Microbial mechanisms of pathogenicity	15	
	Final Exam - Modules 1 – 8		June 13th

Grading Policy

Graded Course Activities

Description	Percentage Points
2 Midterm Exams (30% each)	60%
1 Final Exam	40%
Total Points	100

Note: All exams will be multiple-choice questions delivered online

Late Work Policy

A point will be deducted for each day of late exam submission unless otherwise arranged prior.

Viewing Grades

You will be notified when grades are ready to be viewed

Course Policies

Build Rapport

If you find that you have any trouble keeping up with assignments or other aspects of the course, make sure you let me know as soon as possible. As you will notice, building rapport and effective relationships are key to becoming an effective professional. Make sure that you are proactive in informing me when difficulties arise during the semester so that I can help you find a solution.

Welcome and have fun with microbiology!!!
