LEADERSHIP

PRESIDENT'S MESSAGE

Lakehead University has made great progress over the past year in addressing the critical issues identified in its 2010-2013 Strategic Plan: Sustainability of the University; Comprehensiveness of the Academy; Research Growth; and Diversity.

Since becoming president and vice-chancellor of Lakehead University in August 2010, I have had the pleasure of working with many dedicated students, faculty, and staff, and it is clear to me that Lakehead is focused on a bright future. That future depends upon enhancing the strong community partnerships that the University has cultivated with organizations at the regional, national, and international levels.

CHANCELLOR

- Arthur V. Mauro

BOARD OF GOVERNORS 2010-11

Elected Members:

- Colin Bruce, Chair
- Cam Clark, Vice-Chair
- Kevin Cleghorn, Past Chair
- Ken Chase
- Andy Crooks
- Chris Fernyc
- Judy Flett
- David Heroux
- Len Hoey
- Anthony LeBlanc
- Maria Phipps
- Frances Picherack

A Snapshot of Our Growth

Orillia

Lakehead
UNIVERSITY

Student Enrolment

- Business
- Social Work
- Education (Prof. Yr + 1 Yr)
- Graduate Studies
- Interdisciplinary Studies

Note: Program totals = Head Count
Total count (above bar) = Full Time Equivalent (FTE)

Enrolment Growth

Debbie Balika (HBASc/BEd '11) not only has the distinction of being a member of Lakehead Orillia's charter class, but as a graduate student, she represents the most enduring student at the Orillia campus. Balika, of Barrie, Ontario, is enrolled in the Master of Science in Biology program, along with Sheri O'Connor. They represent **the first full-time graduate students** at the campus.

Industry Partner Supports Orillia Campus Teaching and Research

Chris Murray, an assistant professor in the Department of Interdisciplinary Studies, is looking for better ways of filtering water to reduce phosphorus and other contaminants

Above: Professor Chris Murray (right) is shown here with students Ethan Mask and Lindsey Jaanussen. Murray and his research team are working with an industry partner, which is developing environmentally sustainable products for the global market

We have many water filtration systems for water we take from our lakes, but what about the water – and pollutants – we put *in* them? Traditionally, storm sewers simply carry runoff into the water system carrying with it pollutants like phosphorus, which is a major cause of algae blooms and fish kills.

Lakehead University Orillia's Christopher (Chris) Murray, an assistant professor in the Department of Interdisciplinary Studies, is looking for better ways of filtering that water to reduce phosphorus and other contaminants. His project represents the first time the Orillia campus has worked with an industry research partner, and the results will likely have world-wide applications.

- Research projects with local business
- Employment opportunities
- Student/faculty/staff local spending
- Supporting Orillia as a destination for business and tourism
