Course Materials

Website: This course uses a D2L (Courselink) site, on which grades and important course information will be posted. You are expected to check this website regularly for announcements and course materials.
(The website can be found at www.mycourselink.lakeheadu.ca.)

Required Textbook & Supplementary Material: There is no required textbook for this course. The course notes will be the primary source of information. Students who desire supplementary material are encouraged to use the two (free!) online textbooks that are available at the following URLs:

Descriptions of Course Components

Lecture: While attendance is not technically mandatory, you are strongly encouraged to come to lecture. As there is no textbook for this course, lectures will be the primary source of material, and there will often be important information regarding assignments and tests conveyed in lecture.

NOTE: *Prior to each lecture, I will upload a document consisting of partially completed notes for that class. You are expected to bring these notes to lecture, and we will fill them in together.*

Lab: While the purpose of the lectures is to introduce new material and discuss mathematical theory, it is in the lab that we will apply the lecture material to solve problems. The notes from these sessions should prove invaluable to you as you work through your online assignments and study for your tests and exam.

Assignments: There will be one online WeBWork assignment each week, except for Week 04 and Week 08 (Winter Study Break Week). While there is a total of 11 assignments, only your best 10 assignments will be graded. A link to WeBWorK can be found on our course website, under "Content".

NOTE: *I am dropping your lowest two assignment marks to account for one missed assignment. If more than two assignment must be missed for a legitimate reason (e.g. illness), the weight of the assignment(s) will be added to the final exam.*

Term Tests: There will be two Term Tests, written during Lecture. These are scheduled for **February 04** and **March 11**. Test #1 will cover Weeks 1-4, and Test #2 will cover Weeks 1-9, with a strong emphasis on Weeks 5-9.

NOTE: *If a term test is missed for a legitimate reason which you can document (e.g. doctor's note), the weight of the test will be added to the final exam.*

Final Exam: There will be a cumulative final exam, date and time of which will be announced as soon as it is scheduled.
