See page 3-4 for a more detailed schedule of topics that we will be covering.

Course Materials

Website: Our Lectures/Labs will take place over Zoom, at the scheduled times (above). The Zoom link is posted on our D2L (Courselink) site, under Course Materials. Courselink will also be the location that grades and important course information will be posted. You are expected to check this website regularly for announcements and materials that you will need to have with you during lecture.

(The website can be found at www.mycourselink.lakeheadu.ca.)

Required Textbook & Supplementary Material: There is no required textbook for this course. The course notes will be the primary source of information. Students who desire supplementary material are encouraged to use the two (free!) online textbooks that are available at the following URLs:

<https://openstax.org/details/books/calculus-volume-1> - Calculus Vol. 1 by Herman and Strang

<http://www.apexcalculus.com/downloads/> - Apex Calculus, Version 3 by Gregory Hartman

Descriptions of Course Components

Lecture: While I will not be taking attendance, you are strongly encouraged to come to lecture. As there is no textbook for this course, lectures will be the primary source of material. As well, there will often be important information regarding assignments and tests conveyed in lecture.

NOTE: Prior to each lecture, I will upload a document consisting of partially complete notes for that class. You are expected to bring these notes to lecture, and we will fill them in together.

Lab: While the purpose of the lectures is to introduce new material and discuss mathematical theory, it is in the lab that we will apply the lecture material to solve problems. The notes from these sessions should prove invaluable to you as you work through your online assignments and study for your tests and exam.

Assignments: There will be one online WeBWork assignment active from Tuesday to Monday each week, except for Week 1, Week 14, and Week 6 (Fall Study Break Week). While there is a total of 11 assignments, only your best 10 assignments will be graded. A link to WeBWork can be found on our course website, under "Content".

NOTE: *I am dropping your lowest assignment mark to account for one missed assignment. If more than one assignment must be missed for a legitimate reason which you can document (e.g. doctor's note), the weight of the assignment(s) will be added to the final exam. **Under no circumstances will late assignments be accepted!***

Term Tests: There will be two Term Tests, written during Lecture. These are scheduled for **October 07** and **November 16**. Test #1 will cover Weeks 1-5, and Test #2 will cover Weeks 1-10, with a strong emphasis on weeks 6-10.

NOTE: *If a term test is missed for a legitimate reason which you can document (e.g. doctor's note), the weight of the test will be added to the final exam.*

Final Exam: There will be a cumulative final exam, date and time of which will be announced as soon as it is scheduled.
