Welcome!

Welcome to Math 1071. As your instructor, I'm excited to have you in my class this semester and hope to get to know you well during our time together. For many of us, this class may at times feel like a struggle, but know that you are not alone and have a whole community that includes myself and your classmates as resources that can help support your success. Other resources on campus are discussed in more detail later in the syllabus. In our classroom, diversity and individual differences are respected, appreciated, and recognized as a source of strength. Students in this class are responsible for creating an environment where everyone feels welcome to speak up and participate during class and where carefully and respectfully listening to each other is the norm.

Material

Required Text

Fitzpatrick, Sean. *Elementary Linear Algebra*. Spring 2020 edition. You can find it at https://www.cs.uleth.ca/~fitzpat/Textbooks/Math1410_ebook.pdf.

Course Website

This course uses a D2L (Courselink) site, on which grades and important course information will be posted. It is advisable to regularly visit this website to keep yourself updated on any changes and to access any resources related to the course. (The website can be found at www.mycourselink.lakeheadu.ca.)

Student Hours

If you have any questions or concerns about the course, or if there's something you're curious about or thinking through, please feel free to stop by my office during Student Hours. Sometimes talking things out aloud can help us make progress. If you can't make it during Student Hours, please send me an email to schedule a meeting time that works for you.

Grading Scheme

15%	Quizzes
10%	Assignments
30%	Midterm Exams, 15% each
35%	Final Exam
10%	Best of Midterms and Final Exam

Quizzes

Weekly quizzes will take place at the beginning of each Lab. Note that there will be no make-up quizzes, but your lowest quiz mark will be dropped when calculating your final grade.

Assignments

Homework will be assigned every Tuesday via the online homework system WeB-Work. You will have until 2:00 pm ET on the next Tuesday to complete that week's assignment. Please note that late assignments will not be accepted, but your lowest assignment mark will be dropped when calculating your final grade.

Midterms

There will be two in-class Midterm Tests. These are scheduled for October 11th and November 13th. Test #1 will cover Weeks 1-5 and Test #2 will cover Weeks 6-9. There will be no make-up tests. If a midterm test is missed for a legitimate reason, the weight of the test will be added to the final exam.

Final Exam

The final exam will be a three-hour cumulative exam, which will be scheduled by the registrar during the final examination period.

Course Description

The plan is to cover Chapters 3 through 8 of the textbook. The goals are for you to learn about vectors in \mathbb{R}^n , lines, planes, matrix theory, system of linear equations, subspaces of \mathbb{R}^n , linear transformations, and eigenvalues.

Learning Objectives

Students who complete this course should be able to

- demonstrate understanding of the basic geometry of lines and planes.
- demonstrate understanding of the concepts of span, subspace, and linear independence.
- apply Gaussian-elimination to solve linear systems and calculate the inverse of a given matrix.
- compute the inverse of a matrix and solve linear equations by calculating determinants.
- find the eigenvalues and eigenvectors of a given matrix.
