Course Details

Environmental Sustainability 2xxx - Energy and the Environment Start Term: 2015-16 End Term: No Specified End Date
--

<u>Course Details</u>
Code Environmental Sustainability 2xxx
Title Energy and the Environment
Description A course on the interconversion and utilization of energy, traditional and alternative sources, consumption and waste of energy in the industrial society, energy intensity of food production, strategies and technologies for energy efficient construction, impacts on environmental quality and human health.
End Term No Specified End Date
Institution Lakehead University
Faculty Faculty of Science and Environmental Studies
CreditWeight 0.5
Rationale This course will enhance the breadth of environmental science instruction included in the Environmental Sustainability program. The existing program provides many opportunities for students to learn about the aspects of environmental issues with foundations in the disciplines of Biology and Geography, but very little related to the physical sciences. Along with the proposed course in Materials, Manufacturing and Waste, this course will help make our program more comprehensive and increase opportunities for students interested in careers or further education in environmental studies.
