Geography 4911: Special Topics- Development Geography and Global Change

Winter 2017, Tuesday and Thursday, 10:00-11:30 pm OA 1022 (Orillia)

Instructor: Rosario Turvey, PhD

Office: OA 3025

Tel.: 705-330-4008 x 2652

E-mail: rturvey@lakeheadu.ca

Office Hours: 2:00-3:00 pm every Tuesday or by appointment

A. BRIEF DESCRIPTION:

The course focuses on the changing geography of development in the developed and the developing worlds. Structured in three parts, the course covers development theory and practice as well as themes on global resources and environmental change. The first part introduces the theories of, and emerging approaches to development such as ethical development and sustainable development. The objective is to understand the meaning and nature of development from a geographic context. The second part examines the nature of globalization and urbanization and the links between the environment, resources and development. The third part focuses on aspects of global change in relation to world peace, security and governance. Analytical techniques such as indices of development (e.g., HDI) and the practice of development will be discussed to understand the spatial impacts and implications of development and change on people, places and environments in developing countries.

B. PRE-REQUISITE: NONE

C. TEXTS (Required and Recommended)

Required Text: Desai, V. and Potter, R. (Eds). 2014. *The Companion to Development Studies*, 3rd Edition, London and New York: Routledge (Paperback)
