

GEOG 2811 FDE- Cultural Geography

Winter, 11:30-1:00 pm, Monday and Wednesday, OA 2015

Course Description

This Geography course examines the spatial aspects of human interaction, culture and techniques. Topics and themes include key concepts in human geography and the spatial aspects of population and health, migration, culture and social media, race and ethnicity, politics, services, settlements and urban patterns. Course delivery involves a series of lectures, class exercises and readings on the cultural landscapes from a human geography perspective. Both traditional and contemporary geographic concepts and theories will be studied in the 'every day world' to understand various identities and cultural landscapes. The relevancy of the 'new cultural geography' will also be discussed as it relates to environmental sustainability, and to better understand current debates on such topics as race and cultural wars, gendered landscapes, culture and the environment.

Learning Objectives and Expected Outcomes

- a) Introduction to human geography's basic concepts in thinking geographically and thematic areas from population to resource issues with emphasis on cultural geography;
- b) Better understand the geographic expression of culture in existing and emerging landscapes and the links between local and the global space and the geographic aspects of culture;
- c) Learn how the traditional and new conceptual bases of Cultural Geography relate to other areas of interest and academic disciplines especially anthropology, history, political science, sociology and other interdisciplinary concerns;
- c) Study and understand the relationship and role of culture in promoting environmental sustainability;
- d) Clearly appreciate the role of place, society and the environment in the evolution of landscapes, identities and inequalities.
