

UNDERGRADUATE THESIS SEMINARS 2015

FRIDAYS – 10:30 a.m. in CB 3031

HONOURS PRESENTATIONS

Friday, March 13

- JORDAN BAIRD - *Deformation of the Gunflint Formation*
- JOSH BUOSI - *Geologic Characterization of the Sharpsand river IOCG Prospect, north eastern Ontario*
- KARA COX - *Monitoring stream remediation of Kama Creek to determine if more work is needed to prevent damage to current stream structure by rock movement or loss of water to lower groundwater table*

Friday, March 20

- JAKE DOVE - *Gold Mineralization on Neepawa Island*
- KEVIN DUMOULIN - *Petrology and Geochemistry of the Campbell Diorite, Red Lake*
- SADIE FISCHER - *Biological Mats in Siliciclastic Sediments of the Gunflint and Rove Formations*

Friday, March 27

- SHEREE HINZ - *Geochemistry of the Badwater syenite*
- MICHAEL McLEOD - *Petrology and geochemistry of the mafic dikes at Hemlo Au mine*
- DOUG NIKKILA - *Mineralogy and petrology of a newly-discovered REE occurrence within the Coldwell complex near Marathon, Ontario*
- ZACH PRINSLOO - *Mineralogy and Petrogenesis at the Hindon Cu-PGE Prospect, Central Ontario*

Tuesday, APRIL 7

- MATT ARGES - *Mineralogy and petrology of the spodumene-rich pegmatites and associated veinlets from the Rock Teck Li project, Georgia Lake Area, Quetico Subprovince, Ontario*
- TYLER WILLIAMS - *Microstructural analysis of gold mineralization at St Andrew Goldfields, Kirkland Lake, ON*
- ALLEN WYWROT - *Mineralogy and petrology of a newly-discovered Paralampoite occurrence near Marathon, Ontario*
- NATALIE ZWANENBURG - *Physical controls on plant communities and soils on rock outcrops in the Thunder Bay area*

CLASSES END ON APRIL 7, 2015
