

## MEDICAL DOCUMENTATION FORM

**This page is to be completed and signed by the student PRIOR TO asking a health care professional to complete the Medical Documentation Form**

The form below is to be submitted by students seeking disability related accommodations to a licensed health care professional in order to register with Lakehead University's Student Accessibility Services (SAS).

Students are not required to disclose their specific disability diagnosis in order to register with Student Accessibility Services (SAS) to receive academic accommodation. The Ontario Human Rights Commission recognizes that Disability Services Offices have expertise in dealing with accommodation issues in the academic environment, and as such, play a vital role in assisting with the accommodation process. If students wish to, they may voluntarily disclose their diagnosis to SAS.

Providing diagnoses may be required to establish eligibility for certain federally or provincially funded bursaries and grants and privately funded external scholarships and financial awards. This Form can therefore also be used to establish eligibility for such financial assistance, provided the student has consented to the disclosure of their disability diagnosis.

This form and its articulated purpose is consistent with the Ontario Human Rights Commission's Policy on preventing discrimination based on disabilities and the Lakehead University Documentation Guidelines for Students with Disabilities/Medical Conditions.

Check one of the consent boxes below to indicate if you choose to disclose your specific diagnosis or to not disclose the specific diagnosis.

**Dear Health Care Practitioner,**

You have been asked by a student who wishes to register with Student Accessibility Services (SAS) at Lakehead University to complete the enclosed documentation. SAS is a Disability Service Office for students who **require academic accommodation for a permanent or temporary disability**. Interim accommodations can be provided for students who are in the process of being assessed for a mental health disability.

As you know, the post-secondary environment involves taking examinations, doing research, completing assignments, and assuming responsibility for one's higher education pursuits. The purpose of the SAS medical/psychological documentation is to enable Disability Advisors to recommend appropriate academic accommodations for students with disabilities who experience functional restrictions and limitations which affect their academic participation and performance.

We are accountable under the Ontario Human Rights Code and the Lakehead University Senate Policy on Accommodations for Students with Disabilities. These guidelines help us provide equitable academic accommodations that level the playing field for students with disabilities without creating an unfair advantage or undermining academic integrity. **We rely on your detailed knowledge of this student's disability to complete the following form which includes providing a list of the functional limitations and restrictions that may impact their education together with any other relevant information. Please note that unless the student's signed consent is attached, we only require the category of the disability, we do not require the specific diagnosis.**

Thank you for helping to reduce barriers for students with disabilities while upholding the academic standards of the university.

**This form must be completed by a licensed medical practitioner or registered psychologist.**
