

The main themes of this course are: mathematical reasoning, algorithmic thinking, and combinatorial analysis, that is, how to solve counting problems.

 $Time \quad Class: MWF \ 10:30-11:30 \\$

Lab: Th 10:30-11:30

Place Class: Regional Center 1002

Lab: Regional Center 1001

Instructor Adam Van Tuyl

Office Hours: TBA

Text Discrete Mathematics and Its Applications (6th Edition) by K. Rosen

Email avantuyl@lakeheadu.ca

Web Page http://flash.lakeheadu.ca/~avantuyl/courses/2010_11_math1281.html

Contact Information. The best way to contact me is via email. The class webpage is also a good source of information. I update the webpage after every class.

Outline. Math 1281 is a year long course. During the fall semester we will cover Chapters 1-5 of Rosen's textbook. During the winter semester, we will cover Chapter 6-11. We will cover each section of the textboo, with some exceptions.

Lab. Math 1281 has a lab component. The lab hour (which is held once a week on Tuesdays) will be a chance for you to come to see me about problems with the material. Attendance of the lab hour is entirely voluntary.

Marking Scheme. The evaluation is composed of three components.

1. Homework (10%) A homework assignment will be given out every Friday. It will be due the following Friday at the *beginning* of class. There will be 9 homework assignments per semester. For each semester, the homework assignment with the lowest grade will not be counted. The solutions will be posted on ERES, the electronic reserve of Lakehead Library, once the assignments have been handed in (a link is on the webpage).

All of the homework questions will be taken from the text book. Exercises will be marked out of 2 or 4 points, depending upon the level of difficulty.

Questions out of 2 points will be graded as follows:

- [2 pts] Near perfect or perfect solution. A near perfect solution is a solution that is correct up to the final stage with possible mistake or sign error at the last step.
- [1 pt] The solution shows some of the needed ideas, but fails to have the final solution.
- [0 pts] Little or no progress is made toward the solution.

Questions out of 4 points will be graded as follows:

- [4 pts] Near perfect or perfect solution. A near perfect solution is a solution that is correct up to the final stage with possible mistake or sign error at the last step.
- [3 pts] Most of the needed ideas are present, but misses a key point, or is poorly written.
- [2 pt] The solution shows some of the needed ideas, but fails to have the final solution.
- [1 pt] One or two initial steps are made.
- [0 pts] Little or no progress is made toward the solution.

1

Further notes on homework:

- Every assignment must contain the course number, the assignment number, your name, and your student ID, and the instructor's name. (Every week, hundreds of math assignments are turned in make sure your assignment gets to the right person!)
- Homework must always be stapled together (no paper-clips, folding the pages, folders, etc. will be accepted). Failure to do this will result in 10 points deducted from the assignment. (Paper-clipped assignments have the tendency to fall apart; assignments in folders make more work for the grader.)
- Late homework will have 10 points deducted for every day (the weekend is counted as one day) that is late. Once the solutions have been posted, you may no longer submit an assignment
- The copying of assignments will result in a mark of 0 for both assignments.
- Homework may be handed in early by either giving it to me or by placing it under my office door. Do **not** bring your assignment to the math office.
- 2. Tests (4 Midterms, 12.5% each x 4 = 50%) There will be four midterms. The midterms are not cumulative. The dates of the midterms are (provisionally):

October 15, 2010 - Midterm 1 November 19, 2010 - Midterm 2 January 21, 2011 - Midterm 3 March 4, 2011 - Midterm 4

- 3. Exams (Final Exam 40%) There will be a cumulative final exam in April. The exact date will be given later once the exam schedule is posted.
- A friendly piece of advice: do not book your plane ticket home until you are certain about the exam schedule. A flight is not an acceptable excuse for missing an exam.
- 4. Challenge Assignments (Bonus 4%) Four times during the year, I will post special Challenge Assignments. These assignments will allow you to look at some of the ideas we have studied in class in more depth. You are under no obligation to do these problems; each assignment will be worth up to 1% bonus mark. Further information will be given out with the first such assignment.

Class Policies. Though attendance is not mandatory, I would appreciate the fact that you show up on time if you do decide to come to class. Arriving late disturbs both me and your fellow classmates. Also, please turn off your phone while in class, and no texting.

Changing Marks. If you disagree and/or have a problem with a particular mark on an assignment or exam, please use the following procedure. First, check you assignment/exam against the solutions. If this does not clear up any problems, on the front of the assignment/exam, please write the question number you want re-graded, and why it should be re-graded. Then hand it back it in. I will then take a look at the assignment/exam and see if the mark needs to be adjusted. If there is simply an addition error with the marks, please hand it back in to me with the correct number at the top.

Exams and tests must be taken on the date assigned, except if there are medical or family emergencies. In these cases, notes will be required.

Important Dates.

Sept. 13, 2010 - First semester begins

Oct. 11, 2010 - Thanksgiving (No classes)

Oct. 15, 2010 - Midterm 1

Nov. 19, 2010 - Midterm 2

Dec. 6, 2010 - First semester ends

Jan. 4, 2011 - Second semester begins

Jan. 21, 2011 - Midterm 3

Feb. 4, 2011 - Last day to drop without academic penalty

Feb. 21-25, 2011 - Reading Week (No classes)

March 4, 2011 - Midterm 4

April 4, 2011 - Second semester ends

April 6-16, 2011 - Final Exams
