Technology, Society, and Indigenous Peoples of Canada
SOCI-2755-WDE 2020
Mr. Brian McMillan
brian.mcmillan@lakeheadu.ca

COURSE OUTLINE

This course of study examines the relationship between technology and society. The course proceeds according to a *socio-technical perspective*; that is, the notion that technology and society share a reciprocal relationship wherein first we shape our technologies, and then our technologies shape us. The course begins with a breakdown of the concept “technology” in an attempt to determine its fundamental nature. To this end we will examine technology’s linguistic roots and historical *raison d’être*, its essential components, its relationship to rationalism and social progress, and its tendency in modern societies to alienate and disempower. We will examine various sociological theories which inform our understanding of technological development and diffusion (e.g., Technological Determinism, Social Constructivism, Convergence Theory, and so on).

The course will identify several sources of technological change (from the contributions made by self-reliant, genius inventors of yesteryear to the hi-tech, corporate research laboratories of today) and examine a number of high profile technological impacts such as fossil fuels, bio-engineering, printing, mass production, the internet and others. The course of study includes a careful examination of the differential effects of technological change and the tendency for the benefits, and the costs, of technological development to be unequally distributed throughout the population. We will study the historical relationship between science and technology, the patterns and theories of technological diffusion, the role of engineers and other experts in the development of technology, the reciprocal relationship between organizational structure and technology, and the role of the government in determining the direction and pace of technological change. All of these topics, and others, will be considered in light of an important observation in the sociological study of technology; namely, technology is a subversive social force... it delivers benefits, but it also exacts costs. And not always in equal measure.

The course of study will also pay special attention to technology and Canada’s Indigenous peoples. Content may include topics such as the impact of major technological systems on the social and economic development of isolated Northern communities, the incorporation of new information and communications technologies into human services on First Nations reserves, traditional Native worldviews vs. the modern scientific approach, technology’s role in efforts to resist cultural assimilation, the impact of legal decisions regarding technology on Aboriginal treaty rights, the role of technology in the perpetuation of Native stereotypes, prejudice, and discrimination, and more.

How to Proceed Through the Course of Study

This course of study has no classroom. Rather, it features an excellent book and a variety of online articles and videos. Rudi Volti’s *Society and Technological Change* (8th Ed) identifies and

discusses most of the important theories and basic concepts needed to develop a thorough understanding of how society shapes technology and, in turn, how technology shapes society. The various online articles provide insight into the nature of the relationship between technology and Indigenous people.

The course is comprised of 6 study modules. Each module includes learning objectives, brief chapter synopses, review questions for the required Volti chapters and the online articles, and titles and links to supplementary online videos and articles.

Here is what I recommend:

- Set aside a minimum of 5-6 hours each week, find a quiet room, close the door, shut out the world, and focus on the required Volti readings, online articles, and videos.
- While reading, take notes which address the Review Questions which accompany each Study Module found in the course package. When I set the examinations, I will use the Review Questions as my primary guidelines.
- You might also use the various synopses of the Volti chapters that appear in the course package to help identify the most important terms and concepts for each required Volti chapter.
- Follow along with the Course Schedule, and do your best not to fall behind!

If you have a question, post it in our Discussion Area and I, or one of our classmates, will respond. Or you may simply send me an email using brian.mcmillan@lakeheadu.ca

Required Reading Material

Volti, Rudi. 2017. *Society and Technological Change*. 8th Edition. New York: Worth Publishers. ISBN-13: 978-1-319-05825-8

Online Articles: You are also required to read several online articles throughout the course which pertain specifically to Canada's Indigenous peoples and various technology-related issues. The titles and URLs of these articles can be found in their respective Study Modules in the Content area of our course site (see navigator bar at top of page).

Video Material

The course of study includes several online videos. These videos should be considered required viewing and are meant to deepen your understanding of important course concepts and, in particular, important issues of relevance to Canada's Indigenous peoples. You are encouraged to view the videos and post any comments you might have in the appropriate discussion forum. You are also encouraged to read the posts of other students and are invited to respond to any and all posts. The titles and links to the videos can be found in their respective Study Modules in the Content area of our site. The videos are not included in the examinations.

Grading Scheme

Exam #1.....	28%
Exam #2.....	28%
Exam #3.....	28%
Assignment #1.....	8%
Assignment #2.....	8%

Written Assignments

You are required to prepare and submit two (2) written assignments during the course. See Contents for descriptions of the assignments. See Course Schedule for submission deadlines. Each written assignment is worth a maximum of 8% of your final course grade. You must submit your assignments using the Dropbox tool (click *Assignments* tab top of page). You must submit your paper in Word format only (or save as Rich Text Format -RTF), no other format will be accepted. A late penalty of 10% per day will be applied up to 48 hours past the deadline after which late assignments will not be accepted.

Timed Online Examinations

There are 3 examinations scheduled throughout the course of study. The exams are accessed using the *Quizzes* tab on the navigator bar at the top of the page. All 3 exams will be based on the required readings in Rudi Volti's *Society and Technological Change*, and the required online articles pertaining to Indigenous issues.

All 3 examinations will be timed online tests. Timed online tests can be taken from any computer connected to the internet. I advise against the use of smartphones, or any other wireless devices, because of common connectivity problems. The exams will be comprised of multiple-choice and true-or-false questions. The first exam covers study modules 1 and 2. The second exam covers study modules 3 and 4. The third exam covers study modules 5 and 6. Please see the *Grading Scheme* for the weighting of exams, and the *Course Schedule* for examination dates and times.

Timed online examinations must be written during the prescribed examination windows; for example, 9:00 a.m. – 8:00 p.m. Eastern Time. You must login sometime during the prescribed examination window and complete the exam in a single sitting. You will not be allowed to commence before the designated start time (e.g., 9:00 a.m.) and you will not be allowed to commence after the designated completion time (e.g., 8:00 p.m.). You will be allowed to login in only once. See the Course Schedule (*Content* tab) for examination window dates and times.

The timed online tests will be administered through our course website (D2L). At the time of the exam you will be required to login using your usual Lakehead University username and password. I have set up a mock timed online test to give you a chance to practice logging, answering questions, and moving from one page to another. Click the *Quizzes* tab on the navigator bar at the top of the page to access the practice quiz.

Please Note: *Lakehead University has a very strict policy regarding the failure to write formally-scheduled examinations at the prescribed time. Special accommodations, such as a make-up exam, will only be offered when missed examinations are due to medical reasons, for*
