OBJECTIVES AND CONTENT:

The purpose of this course is to familiarize the students with the quest for order and durable peace in world politics. It will analyze conflicts and conflict resolution mechanism from a variety of perspectives. The course will examine the theoretical and applied dimensions of contemporary security, crime, and conflict resolution mechanism. First, it will address the approaches to security and conflict; the nature and causes of conflict; threats to peace and security. It will then look at a variety of proposals for eliminating war and conflict in order to provide peace and security to the nations of the world: types of negotiations and mediation practices, bilateral and multilateral negotiations, conference diplomacy, third party intervention, the UN system, functionalism, regionalism and new world order.

This is a seminar course and, therefore each class will be divided into two parts: The first half of the class will be based on lectures and the second half will concentrate on students' presentation, discussion and participation on assigned readings.
