HBA Psychology Orillia

Lakehead University

Department of Psychology

Psychologists share a desire to make a positive contribution to human welfare through understanding and influencing the thoughts, feelings, and behaviour of individuals. How do we perceive, think, and learn? What motivates us? What makes us unique? How are we influenced by our social and physical environments? How do biological factors and/or drugs affect us? Explore a wide range of topics, including biological, cognitive, social, developmental, abnormal, and individual psychology.
